COMPANY CONFIDENTIAL

June 12, 1972 PCB Meeting

Stewart	Horner	McCutchan
Leisy	Engman	Heisler
Hippe	Foresman	Campbell

1. How do we define no knowing discharge?
2. What is the timing on an implementation Schedule?
3. Do we collect PCB data on fish and river water?
4. Are mono chloro biphenyls considered a PCB?
5. Do we restrict our thinking to:
   Department, Incinerator, Rip track
   Plant Sewers 24" & 30" North? Lab Sewer
   Dept. 217 Sewer
   Waste Treatment Plant Influent-Effluent
6. Should we attempt to verify reserviors of PCB's and/or leaching action by background water and cross contamination in plant sewer system- Do we ignore or do we clean and/or repair?
7. Is present methods of analysis satisfactory?
8. Should we have comparative results using our method and the governments'?
9. Do we get specific with Feds related to sampling procedure?
10. What type of sampling data do we present and how are data presented?
11. Who presents data to Feds.
12. Is there a plant spokesman (interface with Feds) or from G.O.
13. What legal counsel should be employed?
14. With what other legislation must we be concerned?
15. Do we invite, restrict, delay, encourage Fed inspection of plant facilities?

DSW 383659

16. Do we report our production rate - customer information?

17. Do we divulge process information, Hcl distribution system?

18. Do we divulge PCB data on WGK finished goods (Hcl, Cls, $POcl_3$, Acl, P-phenetidine)?

19. Do we discuss chemical landfill - air emissions?

20. What if any press release, (rebuttal) should follow, precede the tash force & EPA news release: re: PCB?

21. How should local government officials be handled (prior or after) news release? E. ST. Louis - Sauget - St. Louis - Price

22. Should we get involved with, band together, exclude customers, re PCB strategy?

23. Do we keep high or low profile?

GOALS & STRATEGY

1. Continue PCB production @ WGK indefinately

2. Restrict PCB - Dept. & Incinerator

3. Need fish Data

4. Program to get to lowest achievable level

5. Resolve analytical methods (Monsanto - Federal) (low-key basis)

6. Sampling - Slow for history

7. Develope ball park figure for total program cost.

8. No process information divulged

9. Resolution of press release

10. No contact with EPA until we get fish data

11. Chronological data re PCB history Monsanto Co.
