RE: Emission Inventory Permit Consistency Review  
Talos Energy Offshore, LLC – Main Pass 72A Production Facility (AI# 17198)

Dear Mr. Sheninger:

The U.S. Environmental Protection Agency (EPA) Region 6 is working with the Louisiana Department of Environmental Quality (LDEQ) and has reviewed your facility's 2018 emission inventory for criteria pollutant and hazardous air pollutant (HAP) emission totals, as reported to LDEQ. Based upon this review, EPA has determined that your reported emissions for some Emission Points exceeded your permit authorization limits. EPA had also reviewed your Title V reports for 2018 and did not find that these permit exceedances were reported.

A detail by Emission Point of the differences between the reported emissions and permitted limits is included in the attachment to this letter. EPA is providing you the opportunity to clarify or explain these differences, especially if any of the following conditions are present:

- Sources and associated emissions included in the emission inventories that are not represented in permits (e.g. de minimis sources);
- Criteria pollutants or individual HAPs reported in the facility's emission inventories that are not represented in LDEQ permits or authorizations;
- Reported or unreported upset or other excess emission events (e.g. startup/shutdown).

If Talos Energy Offshore, LLC (Talos Energy) is interested in discussing or providing information about this matter, you have twenty (20) working days from receipt of this letter to inform EPA by e-mail by contacting:

Kevin Kim  
Enforcement Officer (ECDAT)  
Air Toxics Enforcement Section  
U.S. EPA, Region 6  
email: kim.kevin@epa.gov

Subsequent to the above-referenced due date, Kevin Kim will arrange to meet with Talos Energy via conference call. At that time, Talos Energy may provide additional information to address the

potential violations and present evidence that contravenes EPA's evidence. The primary goal is to ensure compliance with the applicable environmental laws and regulations; however, settlements will be available where appropriate.

Please direct questions to Kevin Kim of the Air Enforcement Branch at 214-665-8554 or at [kim.kevin@epa.gov](mailto:kim.kevin@epa.gov). Thank you for your attention to this matter.

The EPA acknowledges that the COVID-19 pandemic may impact your business. If that is the case, please contact us regarding any specific issues you need to discuss.

Sincerely,

Steve Thompson  
Chief  
Air Enforcement Branch
