P. G. Benignus
J. H. Davidson/R. E. Hatton
F. H. Langenfeld
W. B. Papageorge - B2NA
R. Davis - B2SF
W. R. Richard - T3A

I attach a compilation of OSHA data sheet status on Fluids. You will note we still need some: These are:

Therminol 88
Santosol 100
Santosol 200
Santosol 300
Santosafe W/G-15
Santosafe W/G-20
Santosafe W/G-30
OS-138
Pydratek 100
Santovac 6
Santotrac 40
Santotrac 50
Santotrac 70
MCS 327
MCS 210
MCS 1330
Pyranol A13B3B-2

I take it that before we commercialize any new or modified product we should get an OSHA data sheet produced. Should marketing managers continue to address such requests to you? Would you consider it worthwhile to include the OSHA data as an appendix in our product bulletins. This would relieve us of an office chore of having to reply individually to each request.

Cumming Paton
