

PAINT with LEAD for sure protection

If anyone knows good paint, the experienced painter does. What do you find him using? Pure lead paint—good old-fashioned "lead and oil" mixed of pure white-lead, such as Dutch Boy, and pure linseed oil.

This is the paint to use on your house—on all your buildings. It provides sure protection for property against the weather, wears long, does not crack or scale, saves money in the end.

The well-known Dutch Boy white-lead is now obtainable in convenient, soft paste form. With the soft paste, it takes practically no time at all to mix pure lead paint.

The soft paste, known as Dutch Boy soft paste white-lead, is guaranteed to be pure white-lead in oil and comes in 100 lb. steel kegs; 50, 25 and 12½ lb. steel pails.

For a helpful booklet on painting, write our nearest office for the "Handbook on Painting." 125 pages. Tells how to paint wood, metal, plaster, masonry, etc.

Save the surface and
you save all.
