

<u>Foundries, airborne dust in</u>	456	<u>Pneumoconiosis</u>	
<u>Gastrointestinal disease and environment</u>	419	action of industrial dusts on phagocytic cell	460
<u>Heat and humidity</u>		copper dust	451
heatstroke in gold miners	471	in iron miners	452
physiological adaptations to heat-stress	470	production of mesothelial tumors	463
<u>Hemolytic chemicals</u>		pulmonary effect of structureless asbestos	
hypersusceptibility test for	432	dust	469
<u>Hydrazine derivatives, eczema from</u>	428	rheumatoid in coal miners	458
<u>Industrial health</u>		size of x-ray film for diagnosis	465
methodology in studies of	414, 415	<u>Polyoxyethylene(8)-stearate as carcinogen</u>	431
<u>Industrial medicine</u>		<u>Psychiatry</u>	
evaluation of drugs	413	decisive thinking in emotional disorders	416
<u>Insecticide(s)</u>		<u>Radioactive hazards from luminous markers</u>	476
estimation in foods	449	<u>Radioactivity, in drinking water</u>	480
oral poisoning by parathion	448	<u>Radium hazards from markers on ships</u>	476
<u>Lead alkyls, acute effects of</u>	441	<u>Radium-226, ingestion in food and water</u>	477
<u>Lead tetraethyl</u>		<u>Rheumatic diseases, use of muscle relaxant</u>	420
acute effects of	441	<u>Silica dissolution rates in hydrofluoric acid</u>	467
toxicity	440	<u>Silicosis</u>	
<u>Lead tetramethyl</u>		anti-lung antibodies in	461
handling gasoline containing	439	effect of ultraviolet light	464
potential hazard of exposure to	438	in lead and zinc mine in Rajasthan	411
toxicity	440	<u>Silicotics, reactions under influence of dusts</u>	462
<u>Legal liability</u>		<u>Silicotuberculosis in a tunnel worker</u>	466
volunteers testing new drugs	407	<u>Smoke, estimation of density in air</u>	481
<u>Leukemia, and roentgen diagnosis</u>	479	<u>Snake bite observations on 125 cases</u>	424
<u>Mercury</u>		<u>Sodium chloride, pathology of acute poisoning</u>	436
absorption and excretion in man	442	<u>Staphylococci, dispersal in hospital wards</u>	412
"Metal ague", from zinc galvanizing	443	<u>Thorium, hazards in processing</u>	478
<u>Nitrogen tetroxide</u>		<u>Toxicology</u>	
exposure in missile industry	430	role of behavioral toxicity	433
<u>Noise control and reduction</u>		test for hemolytic chemicals	432
practical assessment of	472	<u>Ventilation for benzene control</u>	485
<u>Ophthalmology</u>		<u>Viper bite, observations on 125 cases</u>	424
1,000 contact lens cases	417	<u>Waste disposal</u>	
<u>Paraphenylenediamine dyes</u>		city-company teamwork in	492
cardiovascular lesions from	444	iron pickle liquor	494
<u>Parathion poisoning by oral route</u>	448	phosphorus manufacturing plant	493
<u>Pesticides, health hazards from</u>	447	<u>Workmen's compensation</u>	
<u>Pneumoconioses (bk. rev.)</u>	410	asbestosis-tuberculosis in Germany	468
		<u>X-ray(s)</u>	
		acute superficial burns	475
		in cancer therapy	473
		and incidence of leukemia	479
		protection against hazards of	474
		size of film for pneumoconiosis diagnosis	465
		<u>Zinc galvanizing hazards</u>	443
