

INTERIOR DECORATION...PROTECTION

Interior of Jewish Synagogue, Council Bluffs, Iowa, painted with Dutch Boy White-Lead and Lead Mixing Oil by painting contractor, H. J. Mosher. The members of the church are reported exceedingly well pleased with the appearance.

Brick exterior of First National Bank, Council Bluffs, also painted by Mr. H. J. Mosher with Dutch Boy White-Lead and Lead Mixing Oil. Bank officials were so well pleased, they had interior finished with the same paint.

use the same **FLAT PAINT** *for Both!*

Here's a flat finish so sturdy it stands up outside, and at the same time so rich and beautiful you'll be proud to use it for the finest interior decoration.

The fact that it defies the weather on outside jobs (for this flat paint thoroughly seals and waterproofs stucco, concrete, brick and stone) gives you a good idea how it withstands wear and repeated washing on inside jobs. This is a finish that is difficult to soil perma-

nently. Ink stains, pencil marks, finger smudges, grease and dirt can all be completely removed.

All your painter needs to produce this vastly improved flat paint is Dutch Boy White-Lead and its special companion product...Dutch Boy Lead Mixing Oil.

In addition to extraordinary durability and white-lead's characteristic beauty, you also get these other important advantages:

Easy to mix—just add

Lead Mixing Oil to white-lead. Levels out smooth and even. Requires no stippling. Has excellent sealing qualities. Hides fire-cracks. Brushes with the ease and high spreading rate of all white-lead paint. Gives a white-lead "flat" at a reduced cost per gallon.
