

CODE of ETHICS for ENGINEERS

ENGINEERING work has become an increasingly important factor in the progress of civilization and in the welfare of the community. The engineering profession is held responsible for the planning, construction and operation of such work and is entitled to the position and authority which will enable it to discharge this responsibility and to render effective service to humanity.

That the dignity of their chosen profession may be maintained, it is the duty of all engineers to conduct themselves according to the principles of the following Code of Ethics:

- 1—The engineer will carry on his professional work in a spirit of fairness to employees and contractors, fidelity to clients and employers, loyalty to his country and devotion to high ideals of courtesy and personal honor.
- 2—He will refrain from associating himself with or allowing the use of his name by an enterprise of questionable character.
- 3—He will advertise only in a dignified manner, being careful to avoid misleading statements.
- 4—He will regard as confidential any information obtained by him as to the business affairs and technical methods or processes of a client or employer.
- 5—He will inform a client or employer of any business connections, interests or affiliations which might influence his judgment or impair the disinterested quality of his services.
- 6—He will refrain from using any improper or questionable methods of soliciting professional work and will decline to pay or to accept commissions for securing such work.
- 7—He will accept compensation, financial or otherwise, for a particular service, from one source only, except with the full knowledge and consent of all interested parties.
- 8—He will not use unfair means to win professional advancement or to injure the chances of another engineer to secure and hold employment.
- 9—He will cooperate in upbuilding the engineering profession by exchanging general information and experience with his fellow engineers and students of engineering and also by contributing to work of engineering societies, schools of applied science and the technical press.
- 10—He will interest himself in the public welfare in behalf of which he will be ready to apply his special knowledge, skill and training for the use and benefit of mankind.

PREFACE	i
EDITORIAL ACKNOWLEDGMENT	iii
CODE OF ETHICS FOR ENGINEERS	vi
CONTENTS	vii
INDEX TO TECHNICAL DATA	viii
CHAPTER 1. Air, Water and Steam	1
CHAPTER 2. Refrigeration	35
CHAPTER 3. Physical and Physiological Principles of Air Conditioning	55
CHAPTER 4. Natural Ventilation	85
CHAPTER 5. Heat Transmission Coefficients and Tables	99
CHAPTER 6. Air Leakage	131
CHAPTER 7. Heating Load	143
CHAPTER 8. Cooling Load	157
CHAPTER 9. Central Systems for Heating and Humidifying	169
CHAPTER 10. Central Systems for Cooling and Dehumidifying	185
CHAPTER 11. Cooling Methods	195
CHAPTER 12. Humidification, Dehumidification and Water Cooling Equipment	217
CHAPTER 13. Unit Heaters, Ventilators, Air Conditioning and Cooling Units	235
CHAPTER 14. Automatic Control	275
CHAPTER 15. Air Pollution	295
CHAPTER 16. Air Cleaning Devices	307
CHAPTER 17. Fans	317
CHAPTER 18. Sound Control	333
CHAPTER 19. Air Distribution	347
CHAPTER 20. Air Duct Design	363
CHAPTER 21. Industrial Exhaust Systems	383
CHAPTER 22. Railway Air Conditioning	399
CHAPTER 23. Gravity Warm Air Furnace Systems	411
CHAPTER 24. Mechanical Warm Air Furnace Systems	427
CHAPTER 25. Boilers	443
CHAPTER 26. Chimneys and Draft Calculations	463
CHAPTER 27. Fuels and Combustion	483
CHAPTER 28. Automatic Fuel Burning Equipment	497
CHAPTER 29. Heat and Fuel Utilization	521
CHAPTER 30. Radiators and Gravity Convectors	533
CHAPTER 31. Steam Heating Systems	545
CHAPTER 32. Piping for Steam Heating Systems	571
CHAPTER 33. Hot Water Heating Systems and Piping	601
CHAPTER 34. Pipe, Fittings, Welding	623
CHAPTER 35. Water Supply Piping and Water Heating	645
CHAPTER 36. Insulation of Piping	669
CHAPTER 37. District Heating	687
CHAPTER 38. Radiant Heating	705
CHAPTER 39. Electrical Heating	715
CHAPTER 40. Air Conditioning for Industrial Processes	727
CHAPTER 41. Drying Systems	739
CHAPTER 42. Motors and Controls	761
CHAPTER 43. Test Methods and Instruments	777
