IT'S a long jump from the isle of Manhattan, U. S. A., to the coast of Portugal. The two places are widely separated. But outstanding shooters in old New York and the older city of Lisbon are drawn together as one in their preference for U. S. .22 N. R. A.'s.

Geography has no meaning to these ultra-accurate cartridges. Wherever you find small-bore champions, there you will find U. S. .22 N. R. A.'s. They have made an international impression, proving their dependability whether the range is meters or yards.
