INTERIOR FINISH GLOSS

Unexcelled for the finishing of walls, ceilings and woodwork of kitchens, bathrooms, and other places where a durable, mirror-like finish is desired. It can be washed frequently without impairing its brilliancy.

DIRECTIONS

Stir thoroughly with a mixing motion.

ON PLASTER SURFACES—Be sure surface is dry and free from dirt, grease and loose particles. All new plaster or cement walls that show indication of alkali or active moisture should be treated with a solution of one part of Interior Finish Gloss to one solution (two pounds of Commercial Zinc Sulphate dissolved in one gallon water).

OLD PAINTED SURFACES—Walls. If old paint has become porous and worn with age and repeated washings, apply a coat of Interior Base Coat and then proceed as recommended for new unpainted surfaces. If old paint is in good condition, one coat of Interior Finish Gloss is often sufficient. If two coats are considered necessary, apply a second coat after the first has dried. On woodwork, apply a coat of Interior Finish Gloss as it comes from the can.

NEW UNPAINTED SURFACES—On unpainted walls make sure that all water remaining from washing has dried out. For first coat apply Interior Base Coat. Allow to dry overnight then apply a mixture of one-half Interior Finish Gloss and one-half Interior Base Coat. For second coat apply Interior Finish Gloss. On woodwork use Under-Namel (Basecoat Undercoater) in place of Base Coat.
