subject CAPE ASBESTOS TECHNICAL
HELP FOR UNARCOBOARD

cc: Mr. B. E. Boyd
Mr. J. P. Kern
Mr. R. F. Shannon

Following our discussion with John Owens of Cape Asbestos of Great Britain I have talked to Dick Shannon and he would be very pleased to have any technical help that Cape Asbestos is willing to offer concerning high density calcium silicate products, i.e. our "Unarcoboard" on which they have had a lot of experience.

Since Mr. Owens says they would be willing to send a knowledgeable technical man over to give us suggestions and help I think we should pursue this as promptly as possible.

Dick Shannon said that the asbestos we have purchased for our Unarcoboard is a long fiber ^{am}osite which is expensive and has been supplied to us from government surplus which may or has run out. Accordingly, Cape Asbestos should have a real interest as a supplier of asbestos to give us all technical help available.
