10 June 1982

MIDLAND, MICHIGAN 48840

Dr. Carol M. Stack
Chemical Manufacturers Association
2501 M. Street NW
Washington, DC 20037

Dear Carol,

The Medical Director at each of the Dow Vinyl Chloride locations has been designated as the epidemiological contact for the Environmental Health Associates (EHA) update of the Tabershaw-Cooper study. These individuals and their addresses and phone numbers are attached.

I assume the EHA has been informed that the Research Panel member for each company should receive copies of all correspondence to their company contacts since this may help expedite the collection of the data.

Sincerely yours,

T. R. Torkelson, Sc.D.
Toxicology/Medical Liaison
Health & Environmental Sciences
517/636-5197
