SUBJECT: Use and Disposal of Asbestos

In December of 1976 the attached letter concerning the proper procedures to be followed in the handling of asbestos was issued to all plants. All of our plants contain asbestos insulation of one kind or another somewhere in the facility, and it is very important that the procedures that were issued in 1976 are being properly enforced and followed.

There continues to be a great deal of concern on the long-term effects of asbestos exposures even in the very low levels of exposure. It is timely that these 1976 procedures be reviewed to be certain that plants are enforcing and following the procedures outlined. We want to be certain that all plants are following these procedures. Therefore, please note on the face of this letter that these procedures are in force in your plant and return to me in Akron.
