June 13, 1939

Memorandum to:

Dr. R. A. Kehoe

I acknowledge with thanks receipt of your letter of June 6 regarding a paper prepared by Dr. Giroire concerning the medical aspects of the control of the manufacture of tetraethyl lead in France.

Personally, I see no particular objection to the subject matter appearing for publication in medical journals. There may, however, be some reverberation which might cause some disturbance in the minds of workmen handling tetraethyl lead. I should think that that would be up to our colleagues, Kuhlmann, to decide.

I am submitting the text to our duPont friends to ascertain their views and meanwhile will see if there are any objections from some of the people in the New York office.

As soon as I receive the respective views of the various parties contacted, I will advise you.

Mr. John Schaefer
Ethyl Gasoline Corporation
Chrysler Building
New York City
New York

Dear Mr. Schaefer:

Some days ago I received a letter from Mr. Thenault containing a copy of a paper prepared by Dr. Giroire and others on the medical aspects of the control of the manufacture of tetraethyl lead. I have gone over this and have done some editing of it but have not made any attempt to put it in any final form for publication, for the reason that it seemed quite certain to me that it would have to be revised considerably before being acceptable to Ethyl Gasoline Corporation and the DuPont Company.

There is nothing in principle or in detail in the paper which is not suitable for publication in a medical journal from my point of view. On the other hand I could not take the responsibility for approving the information given to matters of manufacture and plant design. Accordingly I am sending the original paper to you in order that you can see the figures and the general arrangement of the article. I am also sending a translation which I think is accurate except to the extent that I have made certain editorial changes and a few corrections.

I would appreciate it if you would go into this matter as fully as you think is necessary both for your colleagues in the New York office and for the DuPont people. When you have made whatever changes or deletions are necessary, you can either return the paper to me or you can deal directly with Thenault about the matter. In any case I should like to know the results of your consideration of the matter, and I should also like to show Giroire and his associates the proper courtesy by informing them of the needs of the situation in advance of any communication to them by way of Thenault.

Please be sure not to lose
the article for I believe there are no other copies
available in precisely this form.

Sincerely yours,

RAK:is

Robert A. Kehoe, M.D.
