Hi Hayley and Millan—I hope you are well. We are looking forward to working with you on the Administrator's visit and itinerary. We are working to propose a draft itinerary now for the visit but I just wanted to confirm that the time 12:30-3:30 still works for you. Also, we would be happy to provide lunch for the Administrator and his team, but just want to confirm that is acceptable to you. Thank you -- Roger

Hello Tim,

As Millan mentioned, I will be assisting with scheduling this event. Would you mind completing the attached meeting request form to provide a few more details? This will be helpful for us to have on file.

We look forward to this event!

Mr. Meyers,

Are you referring to movements on the ground? He will have a security detail and a vehicle that is arranged prior to his arrival into the city.

Milan,

Thanks for the details we will make this work. We would like to assist with transportation in Cincy, are you the person to work through for these arrangements?

Mr. Martella,

Good afternoon to you. Yes, we have you held on the calendar for Wednesday, October 4. We currently have a commitment that morning in DC but expect to be able to get the Administrator into Cincinnati by 1130AM. Additionally, he must travel to Colorado Springs that evening on a 4:50PM flight. Kindly let me know if a timeframe of 1230PM – 330PM might work for what you are envisioning.

Thank you so much for your consideration and I look forward to hearing from you. I have copied Hayley Ford on this email as well as she is assisting us in Scheduling and is likely with whom you will be working.

Warm regards,

Millan Hupp

Ryan and Samantha—I hope you are both well. I am following up on the brief discussion with Administrator Pruitt regarding additive manufacturing in the conversation regarding the ICAO aircraft standards.

Attached is an invitation for Administrator Pruitt and his team to visit GE's industry leading additive manufacturing facility in October. We are confident this will be a valuable educational opportunity and something that transforms the way manufacturing is thought about in the future.

This could be scheduled as a day trip to Cincinnati. We propose October 4 but will be flexible around the Administrator's preferences.

Please let me know if I can answer any questions. We look forward to seeing you then. Thank you -- Roger
