53.	Level one		The 3M Brand 8500 non-toxic particulate respirator is on the first level.
54.	CU on non-woven fiber		In 1956, 3M developed a non-woven fiber. It was decided that a good application
55.	Cartoon. Woman wearing modest two-piece swim suit		would be a disposable bra used while swimming.
56.	Cartoon. Shocked woman in water covering chest w/arms		However, the material disintegrated in water. A minor engineering oversight.
57.	Cartoon. Dismayed woman up to neck in water		And, since 1956 was before the topless craze, the project went "bust".
58.	8500		Fortunately for OH&SP, the material had excellent filtration properties and the self-supporting cup became the comfortable and economical 8500 non-toxic particulate respirator.
59.	1st Level		A non-approved disposable, effective against non-toxic particulates only.
60.	Title: Nuisance and/or Inert Particulate		Non-toxic particulates are those that when inhaled produce no known injury but may cause discomfort or minor irritation.
