Attention: Mr. W. M. Iliff, Secretary

Gentlemen:

VINYL CHLORIDE SAFETY ASSOCIATION

First of all, we must apologize for not having written to you in response to your kind letter of September 25 on the above subject.

We had really intended to send our representative to the October meeting in Houston, Texas, but unfortunately, a rush project came up at the last minute, and this made it extremely difficult for us to send our representative to the meeting.

We are very sorry that we missed the opportunity this time. In spite of our non-attendance at the October meeting, however, we are invariably interested in matters relating to vinyl chloride safety and look forward to the next chance in which we shall be able to show our active participation.

We will greatly appreciate it, if you are good enough to keep us informed of matters such as when and where the next meeting will be held, etc.

Thank you very much for your assistance.
