PROPOSED NEW OSHA STANDARDS - ASBESTOS

The scope of effort required to plan and implement a comprehensive "asbestos" plan exceeds the near-term capabilities of S&IH resources. JLR to draft memo requesting a 3-man Complex ad-hoc team to draft and implement a comprehensive asbestos plan.

Discussion of asbestos fire blankets (fire-proof cloth used in certain hot work). Chemical Safety does not permit use of asbestos cloth, due to a very real (and visible) hazard. Refinery does not normally use, but has no restriction in effect.

T. F. Hruska - action item to preclude use of asbestos blankets by new (incoming) Major Projects contractors, and phase out use by existing Major Projects contractors.
