Aer-O-Water® 3% 3EM

AQUEOUS FILM FORMING FOAM (AFFF)

Liquid Concentrate for use on Hydrocarbons at 3%

Aer-O-Water 3EM is manufactured and tested to meet the stringent requirements of U.S. Military Specification MIL-F-24385F. It is listed on U.S. Qualified products list QPL 24385.

Recommended storage temperatures: Minimum 35°F (2°C) Maximum 120°F (49°C)

Caution

- Do not take internally.
- Protect skin and eyes before using.
- Generic chemical identities are provided for substances considered to be a proprietary trade secret. This product has not been tested as a whole for acute oral and inhalation toxicity, primary eye irritation. This product does, however, contain chemicals which appear on the Pennsylvania Hazardous Substances List. Consult NF's Material Safety Data Sheet for further information.

Safety Instructions

- In case of accidental contact with eyes or skin, flush with water immediately. Consult physician if irritation persists.
- If accidentally spilled, this product may present a slip hazard. Clean up spills promptly by flushing with water.
- Foodstuffs or animal feeds which have come in contact with this product should be discarded.

Instructions

- Use as a fire fighting foam only. Not for any other purpose.
- To use, dilute or proportion with water at 3% (3 parts foam / 97 parts water).
- For recommended application rates and equipment consult National Foam Product Data Sheets and Engineering Manual.
- Do not mix with any other type or brand of foam liquid or otherwise contaminate. To do so may reduce or negate effectiveness and will void warranty.
- Store within temperature range shown above. Refer to National Foam Product Data Sheets and Engineering Manual for storage information.
- When not in use, keep container tightly closed at all times and away from heat, flame, or cold temperatures.
- Inspect contents at least every 12 months. Samples may be sent to National Foam's Technical Service Department. Consult representative for details.
- Do not reuse container. After use, dispose of empty container in accordance with applicable federal, state and local regulations.

RED ALERT

Emergency Response Number
(610) 363-1400

Notice to Customer/User

This product can be a highly effective aid in the suppression and control of the hazards of fire when used in accordance with NF's instructions. However, since NF has no control over the Customer's or User's use of the product, its application rate, application technique, selection of application equipment and maintenance of same, and the many variables associated with fire, hazards to be protected, etc., NF cannot and does not warrant that this product will suppress or extinguish any fire. Customer/User should be aware that dilution, contamination with any other substance or storage outside the recommended storage temperature range shown on this label may render this product ineffective for its intended use. Refer to NF data sheets and bulletins for information on shelf life and storage requirements. Before using, Customer/User shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith. Neither Seller nor NF shall be liable in tort or in contract for any loss or damage, direct, incidental or consequential, arising out of the use of or the inability to use this product.
