Subject: Journalist for Science magazine re. proposed science rule

Hello,

I'm a correspondent for Science magazine. I'm working on a story about the proposed rule regarding disclosure of data used for scientific studies.

I'd like to talk with someone at EPA for some questions I have about the proposed rule.

I'm particularly interested in how the rule, if adopted, might affect the work now happening to review pollution standards for particulate matter (PM 2.5).

Also, the proposed rule makes reference to "growing empirical evidence of non-linearity in the concentration-response function for specific pollutants and health effects."

I would like to know what empirical evidence this is referring to.

My deadline is the end of day Monday. Please contact me at [Ex. 6]

Best,

Warren
