

13:30:39:10 0 Q Every one of those things cuts down on
13:31:13:20 0 the bottom line; doesn't it?

13:31:15:30 0 A Yes, it does. But -- yes.

13:31:18:40 0 Q Have you ever heard the term
13:31:20:50 0 "encapsulation"?

13:31:22:60 0 A Yes.

13:31:24:70 0 Q What do you understand that to mean?

13:31:26:80 0 A Well instead of the asbestos fibers
13:31:28:90 0 floating around freely, they might have a resin
13:31:31:00 0 that encapsulates them. A capsule goes around the
13:31:41:10 0 asbestos fibers.

13:31:41:20 0 Q Did you believe that asbestos containing
13:31:41:30 0 brakes were encapsulated?

13:31:41:40 0 A Essentially, yes.

13:32:01:50 0 Q But would you agree that when those
13:32:01:60 0 brakes are ground, or drilled, or rivetted, or
13:32:01:70 0 beveled, or tapered, that those asbestos fibers
13:32:11:80 0 can get up into the air?

13:32:11:90 0 A On some of those definitions, yes.
13:32:12:00 0 Rivetted, no. But repeat them again, and let me
13:32:22:10 0 answer yes, no on each one of them. They are all
13:32:22:20 0 different.

13:32:22:30 0 Q Well, sure. And maybe you know some more
13:32:22:40 0 practices that even I don't. But I was talking
