FYI

Date 7-5-89

Sodium Sulfate has been delisted from the SARA 313 list as indicated by the attached memo. We have reported the emission numbers for sodium sulfate on the 87 & 88 reports. However, the EPA says these numbers are not put in the public database, they instead are put into a misc. file.

Subject: SARA SECTION 313 REPORT - Revised to include Methanol

Interoffice
Communication

VISTA

Attached is a summary table and the full report for SARA Section 313 reporting requirements. A summary table of 1987 emissions is also attached. Major differences between 1987 and 1988 numbers are listed below:

<u>Chemical</u>	<u>lbs</u> <u>1987</u>	<u>lbs</u> <u>1988</u>	<u>Category</u>
VCM	90,480	73,554	Air (stack emissions)
VCM	29,521	3,008	Air (fugitive emissions)
Barium	1,223	388	Offsite (landfilled)
Lead	13,545	6,070	Offsite (landfilled)

VCM air emissions were decreased in both the stack and fugitive categories. The stack emissions were reduced due to more stringent stripping procedures (higher temperature, longer time held under vacuum). The fugitive emissions were reduced as a result of a bagging study completed on the flanges and valves in VCM service.

During 1988 a waste, vacuum/vent dust, was sold as a by-product. Instead of this material being landfilled, it was sold and used in compound production. The amount of barium and lead landfilled was reduced due to this change.

Ammonia and chlorine both reported in 1987 did not meet minimum usage requirements for 1988. Sodium sulfate and methanol were not reported in 1987.

If you have any questions, please refer them to me.

Re: Emergency Planning
and Community Right-to-Know;
Toxic Chemical Release
Inventory Reporting Rule

N O T I C E O F T E C H N I C A L E R R O R

The error(s) noted in the attached error report(s) were identified in your Toxic Chemical Release Inventory report(s). The error(s) must be promptly corrected in order for your data to be accurately represented to the public.

You must correct the errors identified in the attached error report(s) by following these instructions:

1. Make a photocopy of your file copy of the Form R referenced in the attached error report(s).
2. Correct each of the errors listed in the attached error report(s) by marking the correct information on the photocopied Form R in red ink.
3. A senior management official must re-sign and re-date the certification statement at the top of page one of the photocopied Form R by signing above the photocopied signature after reviewing and verifying the corrections.
4. EPA must receive this original error report(s), the corrected Form R(s) with an original certifying signature, and this Notice of Technical Error cover letter. EPA cannot accept photocopied signatures. Mail the error report(s), the corrected Form R(s) and this cover letter within 21 calendar days of receipt of this Notice to:

EPCRA Reporting Center
P.O. Box 23779
Washington, DC 20026-3779
Attn: Toxic Chemical Release Inventory

You must send a copy of this Notice and your corrected error report(s) to the same State organization which received a copy of your original submission.

VAB.0001126117

Please note that, when reviewing the attached error report(s), you may identify some discrepancies between the way you reported certain information and the way that information was entered into the computer. Minor changes, such as abbreviating 'Corporation' to 'Corp.', standardizing the spelling of county names, and standardizing chemical identification information have been made in order to provide data consistency and make the information easier to retrieve from the computer.

For further guidance on how to properly complete the reporting form, please consult the Toxic Chemical Release Inventory Reporting Package for 1990 (EPA 560/4-91-001). To receive a copy of this booklet, or to ask specific questions concerning how to correct the error(s) identified in this Notice, contact:

The Emergency Planning and Community Right-to-Know Hotline
(800) 535-0202 (toll free, outside the D.C. Metro area)
(703) 920-9810 (D.C. Metro and Northern Virginia area)

ATTENTION: Toxic Chemical Release Inventory

Dear Sir:

Attached is a voluntary revision to the 1987 Section 313 reporting requirements for the Vista Polymers facility in Aberdeen, Mississippi. Sodium sulfate was not reported in the 1987 report due to an oversight.

If you have any questions or comments, please contact Frank Jeanson at 601-369-3637.

Sincerely,

R. W. Seymour
