DOCUMENT DESCRIPTION: Letter to Keasbey & Mattison from Vandiver Brown RE Dr. Gardner's Final Report on Asbestos Dust Experiments

50
March 20, 1946.

Mr. Ernest Muehleck,
Keasbey & Mattison Company,
Ambler, Penna.

Dear Mr. Muehleck:

I suppose you are still interested in obtaining Dr. Gardner's final report upon his asbestos dust experiments, but have probably resigned yourself to its indefinite postponement. I had, myself, almost -- but not quite -- reached that same state. Last week, however, I had occasion to lunch with Dr. Gardner's new assistant, Mr. Manfred Bowditch, and availed myself of the opportunity to explain the situation to him and to express the hope that the project might soon be removed from the classification of unfinished business.

Dr. Gardner is away on an extended trip but I asked Mr. Bowditch to advise him upon his return that I had expressed "mild impatience" on behalf of our group.

I trust this will register with the good doctor and you may be sure that if and when I know anything more definite I will communicate with you.

With kindest personal regards, I am

Sincerely,

Vandiver Brown,
Secretary.
