PLAINTIFF'S EXHIBIT
JM 734

Fittings = apply heat to tape to conform it & drive out
coat. Cut [illegible] to fit. Write [illegible] to take are questions.

Under separate cover we are sending two elbows made up with ~~reinforced~~ fiberglass reinforced urethane. We did this by running the glass tape through a urethane dip and wrapping the joint.

We believe this process could be set up with less capital expenditure than that estimated for a spray booth for urethane spraying.
