Administrator Zeldin –

As you know, CEI is devoted to a vision of America and prosperity where all citizens live their own lives, in their own way.

A central obstacle to that goal is the overwhelming burden of harmful regulation. You have set an ambitious and laudable agenda for the Environmental Protection Agency. Attached is an invitation for you to present your vision for the EPA and a freer, healthier, more prosperous America to a select group of CEI's strongest allies.

Please join us in Bar Harbor on June 2. Your participation will be the highlight of the entire policy summit. Please let me know what questions you or your team might have for us.

Warmly,

Kent

Kent Lassman
