

Dr. V. P. Gupta,
Regional Labour Institute,
Sarvodayanagar, Kanpur - 5
U.P., INDIA.

Dated: the 16th April, 1969.

Dear Dr. Kehoe,

It is my pleasure again to write this first letter of the year 1969 to you. It is presumed that you may excuse me for causing this untimely inconvenience by raising some of my curiosities on lead poisoning. I will be grateful to you for your kind comments on the following points:

1. Whether intake of milk by the workers exposed to lead fumes and dust can help to reduce or minimise the effect of lead on the body of worker. If this

through which milk helps to eliminate the lead from the body of exposed workers may be explained. It will be worthwhile to mail reprints on the above or references may be

2. The name of country introduced
workers exposed
factor

With kind regards,

KE 0001639
