Subject: EPA problems at Grand Lake, Oklahoma

Mr Ryan - I worked for Senator Inhofe years ago in Tulsa. I'm writing on behalf of a group of homeowners in Grand Lake who have been struggling for several years now with the EPA on a waste water treatment ruling without resolution.

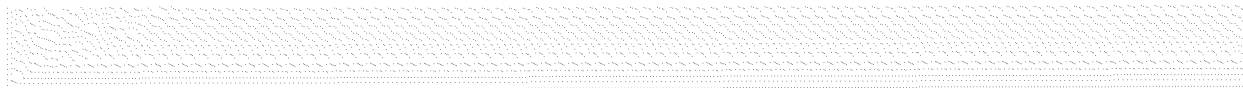

The EPA has issued some findings that threaten to cost home owners \$800K in fees for waste water treatment. These requirements are not being applied to any other homeowners on Grand Lake.

We are looking for help connecting with the right folks with EPA Director Pruitt's office to see if there any other options available.

Could you please help direct me to the right person to find some help?

Doug Farry
