Eden Avenue
Cincinnati 19, Ohio

Dear Bob:

As you know, our old friend Dr. George, erstwhiles of Broken Hill and now of Sydney, has been flying about the North American continent and has now winged his way home.

He discussed the Zinc Corporation's EDTA problem quite fully with me when he was here on April 30th, and I have had exchanges about it with executives of the company in both London and Sydney, and have kept in touch with Dr. George by correspondence up to the time of his departure from Vancouver. A letter from him while there tells of his having written you quite fully and suggests that I might write you also. Not knowing just what he has said to you, I can hardly figure what I might add, but I have rather full notes relative to his contacts with Brieger, Rieders, Cunningham, Riddell and others, and my own with Harriet Hardy, any of which information is of course available to you if you so wish.

In any event, I would be much interested to have a copy of whatever you may write to Dr. George in reply.

Sincerely,

MB:GW
