Mr. Konrad Gentner
INTERNATIONAL RESISTANCE COMPANY
Process Development - Dept. 42
401 North Broad Street
Philadelphia 8, Pennsylvania

Dear Mr. Gentner:

In accordance with your Mr. John H. Cummings' letter of July 17 we are pleased to advise that we have shipped to your attention via Railway Express, 25 cc of commercially pure tetraethyllead.

In response to Mr. Cummings' question regarding the disposal of this material, may I refer you to Section III, Page 1, of the enclosed booklet entitled "Laboratory Use of Ethyl Antiknock Compound".

In addition our Safety Department requires that a release be signed by the individual responsible for the use of this toxic material. Would you, therefore, comply with the latter at your earliest convenience.

If we may render our services at some future date, please advise us accordingly.

Very truly yours,

ETHYL CORPORATION
