MEMORANDUM REPORT #M-34
TALL OIL VARNISHES

The tall oil varnishes included in exposure series #9124 involved the maleic/PE tall oil varnishes but since maleic anhydride is not available at this time, the varnish is of no immediate value to us. However, we are again instigating concentrated effort toward the preparation of varnishes using tall oil and as soon as a suitable varnish has been prepared, we will forward a sample to you.
