SUBJ: VINYL INSTITUTE ANNUAL ENVIRONMENTAL RECOGNITION PROGRAM

*Tickle 10/11
JCL*

VIST

The Vinyl Institute is developing a program to measure environmental performance among PVC and VCM plants and to present awards to the best performers each year. Formulas have been proposed to measure the performance. Please give me your comments on the attached proposed formulas by October 1.

I think the formulas are reasonable. Unless I hear from you, I'll assume you think so also.
