Subject: RE: Ad-Hoc BCR meeting - PFAS REACH Restriction
Attachments: Universal PFAS restriction proposal presentation_BCR adhoc_V20230503.pptx

Dear colleagues,

Many thanks for the interesting discussions during this mornings meeting on the UPFAS restriction.

Don't hesitate to rewatch the recording of the meeting on Teams or to send it to interested colleagues.
As follow-up to the meeting the following:

- In the annex you can find the slides we presented during the meeting, in the slides you can find the links to the documentation we have discussed. We also highly recommend you to have a look at the documentation on the ECHA site (<https://echa.europa.eu/nl/registry-of-restriction-intentions/-/dislist/details/Ob0236e18663449b>) and specifically to the info note which includes some specific questions (<https://echa.europa.eu/documents/10162/cad38c27-ed8-2268-00c6-939ea066743c>), these questions highlight the uncertainties for which additional data is needed.
 - o For info on medical uses we recommend you to look at section A.3.10. and A.3.17. of [Annex A](#) as well as section E.2.9. of [Annex E](#) to see whether data or information is missing from the assessment.

- A [Q&A document](#) has just been uploaded today on the ECHA site on the restriction proposal. It is highly recommended to look at this document to get an understand of how to contribute to the consultation and how the restriction process works.

Lastly we would once again like to invite you to subscribe to the mailing list of the CCIM PFAS working group. By becoming a member of this group we can keep you updated on this restriction proposal and you can be involved in the drafting of Belgian input into the Public Consultation. Within this group we can also further look at what kind of input can be provide to ensure that your concerns are taken fully into account. In case your organization is not yet represented in this group I highly recommend you to contact me ([REDACTED]@health.fgov.be) so I can include you or your colleague in the contact list. Especially for the colleagues from FAGG and FAVV it would still be very valuable to have someone added in this group.

Don't hesitate to contact me if you have any other specific questions or input on this topic.

Kind regards,

Locatie: Microsoft Teams-vergadering

Dear colleagues,

Below you can find the draft agenda for next weeks BCR meeting on the PFAS Restriction. Please be informed that the meeting will only be held online via Teams.

Draft agenda:

- Introduction of the meeting and tour de table
- Introduction to the PFAS restriction proposal under REACH and Q&A
- Brief overview of BE coordinated positions on PFAS
- Discussion on the link between REACH and other legislations
- AOB

Don't hesitate to propose any additional agenda points if needed.

Kind regards,

Dear colleagues,

According to the poll 03/05 would be the best possibility to plan in an ad-hoc BCR meeting on the PFAS restriction. Further information will follow in coming weeks regarding location and agenda and other practicalities.

As mentioned earlier this meeting will be focusing on the PFAS restriction proposal and how this could impact your competence and how we could cooperate and coordinate for this dossier.

In the annex you can find as a reminder the current restriction proposal, please remember this is not a final proposal in any sense, this just gives a first impression of what the restriction could look like.

Lastly, we highly advise you to have a look at the ECHA webinar on this restriction proposal (link: <https://echa.europa.eu/nl/-/restriction-of-per-and-polyfluoroalkyl-substances-pfass-under-reach>) this gives a very nice overview of the restriction proposal and of the restriction process.

Don't hesitate to contact me if you have any further questions.
