Subject: FDA Listing for Fiberloc Mtls

John, can you give me a call to talk about getting FDA listing for various Fiberloc formulations? I'm forwarding a list of products I had asked Connie Dillon research. A number of customers are requesting FDA listing and we have raw materials that do not have FDA clearance.

I understand from Connie that BFG cannot ask FDA for the clearance, only the manufacturer of the constituent product can do that. It seems that the best way to involve our suppliers and request they ask for FDA is through Purchasing, so I'd like to get your help.

My extension is 6175.
