respirable?

A Yeah, these are highly respirable particles. This is a very fine dust because it is created by a friction process.

It is grinding that off the surface, and it creates a real fine dust.

Q I would like to show you now what has been marked as -- premarked as Dement Exhibit Number 3 for identification only, and are you familiar with this process or procedure?

A This person is -- this is sort of a grinder and -- actually it is a belt, and he is applying -- he is belting the edge of a lining and putting it back on and rebuilding a truck shoe. And this is the lining itself, asbestos piece riveting onto a truck. He is grinding it and is going to make its contour.

Q And is this also from the Rohl article, Dr. Dement?

A This is a photograph on the Rohl article.

You can see the debris as he does this. It collects debris all on the work surface, and we clean
