BULLETIN ON ASBESTOS PUBLICATIONS

Library Central Research Laboratories
American Smelting and Refining Company
South Plainfield, New Jersey 07080

PLAINTIFF'S EXHIBIT

CAP-336

November/December 1970

1. -- 371-26

Asbestos-insulated steam lines
get living space. Power
114: 47, April 1970.

2. --

Employment outlook: Asbestos
and insulating workers, 1970.
Bu. Labor Statistics Bull. 1650-
68; reprint from Occupational
Outlook Handbook, 1970-71.
(Mo. Cat. 10/70 #14695). 2PC 154

3. Arav, R.I. et al.

Production of building materials
during complex processing of
brines -- desulfurization of
strong brines with lime &
gypsum dihydrate & mixture with
asbestos produces heat-insul-
ating material. Probl.
Ratsion. Ispol'z. Priir. Bogatstv
Sivasha 1969, 143-52 (In Russ.)
(CA 73: 112,543).

4. Brandt, P.B.

Comparison of the ablation per-
formance of asbestos phenolic
with silica phenolic in the CAL
wave superheater -- five
samples compared with SiO₂ -
phenolic heat-shield material.
AIAA/ASME Struct., Struct. Dyn.
Mater. Conf., Collect Tech. Pap.,
10th (1969), pp. 69-77.
(CA 73: 99475).

5. Brintzinger, Herbert (Papier-
fabrik Schenfelden).

Nonflammable decorative lami-
nates from paper sheets bound
with polyester resins -- paper
containing asbestos or other
nonflam. fibers. Ger. Offen.
1,902,224, 6 Aug. 1970.
(CA 73: 111,184).

6. Bykova, N.A. et al.

Use of a BTMA accelerator for
vulcanizing asbestos friction
products -- such as brake linings
gives better properties & can
be done more quickly than with
standard mixes. Kauch. Rezina
29(7), 24-6, (1970). (In Russ.)
(CA 73: 78291).

7. Courtney, R.J.A. (Henry
Wiggin & Co., Ltd.)

Hot extrusion of metals and
alloys using a lubricant com-
prising calcium silicate and
fibrous material -- substituted
for asbestos durable at 1170-
1220° extrusion temperatures.
Brit. 1,202,483, 19 Aug. 1970.
(CA 73: 90681).

ASARCO ALV 0002356

8. Edwards, H.
Study of the reactions of surface hydroxyl groups of a chrysotile asbestos with organic silanes by means of infra-red spectroscopy. J. Appl. Chem. 20: 76-9, Mr. 170. bibliog.
9. Foster, Helen L.
Nickeliferous serpentinite near Beaver Creek, east-central Alaska -- also contains detectable amts. of Pt. and Pd. U.S. Geol. Survey Circ #615 pp. 2-4 (1969). (CA 73: 79398).
10. Giedt, W.H.
Investigation of the behavior of reinforced plastics subjected to low-heating rates; final rept. -- ablation mechanism of asbestos-filled phenolic plastics studied at 20 to 40 BTU/sec. sq. ft. Mar. 1961. 80p. AD 709,790 (USGRDR 10/10/70 p.208).
11. Griffith, Arvon M.
(Abex Corp.)
Thermoplastic phenolic resin railway brake shoes -- prepared from blended particles of cast iron, graphite, asbestos & a resin. Brit. 1,201,387 5 Aug 1970. (CA 73: 88798).
12. Hifra Le Locle S.a.r.l.
Impact-resistant asbestos cement with melamine resins. -- formulations for asbestos-cements of high-impact strength. Ger. Offen. 1,901,791 20 Aug 1970. (CA 73: 90903).
13. Hoyle, C. et al. (Johns-Manville Corp.)
Thermosetting acrylic resin-coated asbestos yarn for use in papermakers' dryer felts. U.S. 3,519,475, 7 Jly 1970. (CA 73: 89403).
14. Khundkar, M.H. et al.
Catalytic conversion of hydrogen sulfide into carbon disulfide by reaction with carbon tetrachloride vapor -- using asbestos powder as catalyst. Chem. Ind. (London) 1970(30), 991. (CA 73: 81073).
15. Li, A.D. et al.
Possible replacement of sand by serpentine in high-speed filters for industrial waste water purification -- from petroleum refineries; doesn't swell or break up; has larger mud capacity & is cheaper. Tr., Tatar. Neft. Nauch.-Issled. Inst. 1968(11), 156-9 (In Russ.) (CA 73: 101,805).
16. Marotta, Ralph (Monsanto Co.)
Organic liquids thickened with silica-silicate materials -- viz. chrysotile, etc. U.S. 3,525,689 25 Aug 1970. (CA 73: 110,552).
17. Nikolaeva, L.V. & Komandenko, V. Ya.
Wash liquids used during the drilling of oil and gas wells in Eastern Siberia -- heavily loaded with asbestos & starch, best for high production wells. Geol. Neftegazonos, Yuga Vost. Sib. 1969, 301-4. (In Russ.) (CA 73: 111,522).

18. Noonan, F.M. & Linsky, B.
Internal reflection spectro-
scopy applied to air pollution.
Atmospheric Environment 4:
125-8, Mar. 1970.

19. Page, N.J.
Chemical differences among the
serpentine polymorphs. Am.
Mineralogist 53: 201-15,
Ja. '68; discuss. 55: 1025-47,
May 1970.

20. Shuster, R.L. et al.
Use of ore mine wastes as
raw materials for production of
building materials -- asbestos
dressing wastes for mineral
wool. & container glass. O
Kompleks. Ispol'z Nefelin.
Prood Kirg. 1968, 58-62
(In Russ.) (CA 73: 90779).

21. Szymczykiwicz, Konrad.
Pathogenesis of asbestosis --
due to crystal structure and
length of fiber. Pol. Med.
Sci. Hist. Bull. 13(3), 115-19,
138 (1970) (In Engl.)
(CA 73: 85993).

22. U.S. Census Bureau
Abrasive, asbestos, and mis-
cellaneous nonmetallic mineral
products. 1967 Census of manu-
factures. publ'd. Sep. 1970.
41p. MC67(2)-32E. (Mo. Cat.
11/70 #A5604).

23. Werner, Harry

Asbestos-based friction material
for couplings and brakes.
Ger. (East) 71,965, 20 Mar. 1970.
(CA 73: 90835).

24. Wilhelmstal Werke, Wilhelm,
Ernst, GmbH
Permanently deformable fiber
mats --fleece of asbestos fibers
impregnated with resin.
Ger. Offen. 1,910,097, 10 Sep
1970. (CA 73: 110,549).
