SUBJECT Vinyl Chloride Monomer

DATE March 13, 1974

As you may or may not know, I have been substantially involved in the Vinyl Chloride Monomer carcinogenic controversy. I have been working with EID, ICD and R & D on this subject. I understand you have a normal distribution under which you bring to the attention of certain individuals in the company matters regarding this subject. I would appreciate your adding my name to the distribution.

Also, I believe it would be desirable to include Mal Whitlock on the distribution. He has indicated to me that he would like to be included. As you probably know, the Greek plant reports to Mr. Whitlock and Vinyl Chloride Monomer is manufactured at that plant. Mal and I have worked together somewhat on this matter with Esso in Greece, as Esso is the sole purchaser of the Vinyl Chloride Monomer produced by the Greek plant.
