Mr. D. Turner
Humble Oil Company
P.O. Box 61812
New Orleans, La. 70160

Dear Mr. Turner:

Jim Roder, our Therminol specialist serving your area, asked me to send toxicity data on the Therminol FR fluids, toxicity data on Therminol 66, and physical property data on both fluids. This data is included in the attachments.

You are aware, I understand, that the Therminol FR fluids are no longer available and that your interest in the toxicity of the Therminol FR fluids stems from prior experience. The physical property data on Therminol FR-1 is included in the attached conversion bulletin. The bulletin also suggests possible conversion techniques to Therminol 66 in the event you have systems continuing on Therminol FR fluid.

Should you have additional questions regarding Therminol fluids or possible conversion from the Therminol FR fluids, please contact either Jim Roder or myself in our St. Louis offices.

Very truly yours,

D. E. Roush
Technical Manager
