Mr. Robert E. Toth, Director
Risk Management
Monsanto Company
800 North Lindbergh Boulevard
St. Louis, MO 63166

Dear Bob:

We will be pleased if you will join us on Wednesday, August 15, 1984, in the Adams Ballroom of the Palmer House (17 East Monroe) in Chicago for a seminar on managing PCB-related problems.

PCBs are a major environmental issue in terms of actual or perceived health hazards, environmental impact, and financial risk. The seminar will include an overview of the PCB problem the latest regulatory developments, including the EPA's proposed rulemaking regarding PCB-related fires, and advances in measurement techniques and control strategies. FINES?

Please join us for breakfast at 9:00 A.M. After breakfast, Dr. Jaswant Singh, Vice President and Technical Director of Clayton Environmental Consultants, will make a presentation and lead the seminar discussion. There will be time to direct your questions to a panel of experts, which include Dr. Singh and others from industry. Together, they have provided consultation on many PCB projects. The seminar will end at 11:00 A.M. Technical information on PCBs will be provided to all attendees. There is, of course, no charge for the seminar or breakfast.

Please let us know before August 7 if you can attend this important seminar. We hope to see you or someone you may designate on August 15.

Sincerely,

Richard P. Wayne
