

LEAD INDUSTRIES ASSOCIATION

Graybar Building, 420 Lexington Avenue
New York, N. Y.

November 6, 1936.

To Members of the Lead Industries Associations

Subject: Air Hygiene Foundation of America, Inc.

We have been informed by the Air Hygiene Foundation of America, Inc., that they have just published Bulletin No. 1 of the Preventive Engineering Series, prepared by Prof. Philip Drinker and his committee. They advise us that in view of the recent publication of "Industrial Dust - Hygienic Significance, Measurement and Control" by Drinker and Hatch, the Committee felt it would be unnecessary to duplicate this work and to repeat the information available in the book. Therefore, Bulletin No. 1 is restricted to a thorough discussion of troublesome and controversial topics that confront hygienists and industrialists in the general field of dust control.

Copies of Bulletin No. 1 of the Preventive Engineering Series may be obtained through this office at a cost of 15¢ each, plus postage.

Copies of the book, "Industrial Dust" may be obtained through the McGraw-Hill Book Company, 330 West 42 Street, New York, N. Y., at a cost of \$4.00.

Very truly yours,

F. E. Norman

Secretary.
