

at
13.5 cal/cm
for fuel or motor

multistage - cheap & best available to me
for fuel and motor or as a byproduct

Toxicity of alcohol, water & TEL

Problems of slow absorption of fuel

Automobiles -

Supplementary fuel -

about 5% of size of gasoline tank

was supplementary fuel

5 percent to 10 percent

installed in same manner as gasoline tank

would be same

Location of tanks & size of tanks

Manner of dispensing -

same as gasoline fuel
at delivery motor oil in same
can fill to tanks

→ could be a small
electrical fueling system

Law to suggest
that the motor
oil of the water
and fuel tank
be the same
fuel

Atomic Bomb - Phosphorus - absorption

50/50 isopropanol and water

Solids

Blended solids 85% material - water & TEL

they had used 100% - 50 tanks

using the lead in the engine

Background as method of use as anti-freeze
