Turn the magic key of color

EVERY FINISH CORRECT, *as specified on the Household Painting Guide*

MODERN color is the key that will unlock the latent possibilities for beauty in your home. We recommend that you consult the new COLOR SUGGESTIONS of the Sherwin-Williams decorative experts, to be found at the up-to-date paint store known as *Paint Headquarters*. Recognize the store by the sign and by the Household Painting Guide. The Guide stops mistakes in painting by showing the best possible finishing materials for each job.

FREE: If you wish some special individual recommendations for a room or a whole house write to the Sherwin-Williams Decorative Studios. Also send the coupon printed below and receive, free, a valuable brochure in colors on home decoration. Send the coupon *now*.

The Sherwin-Williams Co., *largest paint and varnish makers in the world*, Dept. C, 601 Canal Road, Cleveland, Ohio.

Advantages of Enameloid
The Decorative Enamel

Unequalled color effects—Sky Blue, Willow Green, Tan, Chinese Red, Rose, Orchid, etc.—unusual effects without number. All colors fast. Material flows on smoothly on furniture, woodwork, plastered walls and ceiling. Popular priced. Very durable. Specified on the Household Painting Guide.

Advantages of S W P
The Durable House Paint

Less needed for the job because S W P covers more surface than cheap paint—300 square feet to the gallon, two coats. It spreads easily, saving time and labor. It does not crack, peel, chip or "chalk." It is an oil, lead and zinc paint made of the highest quality materials and ground to extraordinary fineness. Always uniform. Color fast. Specified on the Household Painting Guide.

Write to our Decorative Studios for the exact specifications of the decoration of the breakfast nook shown above.

SHERWIN-WILLIAMS
PAINTS AND VARNISHES

Beautiful and Preserved

S W P is the highest-quality *house paint it is possible to manufacture.* If quality pays anywhere it is in house paint. It costs as much for labor, with short-lived paint, as with S W P, which goes farther, covers better, holds its color and wears so much longer that it pays many times over. "There is no substitute for quality."

Stop Mistakes in Painting

—follow the Household Painting Guide

For instance:— painting woodwork first thing to do.

The joy of new paint

Away, every trace of dinginess! Woodwork, yesterday streaked and dull, today lights up the whole house with its fresh whiteness. Scratched floors that embarrassed beautiful rugs now set them off as a new frame enhances a fine picture. You can see your home begin to smile as each stroke of the brush covers an old surface.

LOOK on the "Guide" for the *right thing to use* for *woodwork*.

Consult the "Guide" before selecting the finish for *any* surface.

Something is wrong when a once beautiful room has to be done over again too soon. The chances are the wrong type of material was used.

Every expert knows that each type of surface (indoors and out) calls for its own type of paint. Paints must be selected according to *type*. The same is true of varnishes, of stains and enamels.

When you look at the Household Painting Guide you look at authoritative recommendations. On a line with the surface to be finished you pick out the correct material as easily as you select a color from the color card.

Save this copy of the "Guide" for use when needed.

Your "Paint Headquarters" *serves you with the Sherwin-Williams Household Guide. It will pay you to look up this store.*

You will know "Paint Headquarters" by the Household Guide displayed in the window and inside the store. This store serves you intelligently, backed by the "Guide." The proprietor and clerks help you save money by avoiding mistakes. Look for this store and "follow the 'Guide'." It costs you nothing to be *sure*.

Write for free suggestions on your painting problems to the S-W Dep't of Home Decoration. Ask, also, for free booklet B 450 and the handsome set of color plates giving eight beautiful color schemes for different rooms. Send 50c (65c in Canada) for the 177 page book of valuable detailed information on beautifying the home. Reproductions of the latest color ideas for interior and exterior—a book you would not part with for many times its price. Write Dept. B 435 at address below.

Getting good work

Hire a good painter if you have big work that calls for help. Ask your Paint Headquarters to recommend a man. If you hire a painter, hire a good one.

0007-SWP-000122341

Prepared House Paint—an asset.

Don't be fooled on House Paint!

"Cheap" paint isn't cheap at all!

WHEN you buy paint to dress up and protect your house, don't let a "low price" blind your good sense. *Thousands of home owners* are bewailing a "cheap" paint job this very minute and paying the penalty in hard cash.

"Cheap" paint is made of cheap or skimpy materials. How else could it be sold at a low price in the highly competitive markets of today?

Cheap or skimpy materials make a poor, weak grade of paint. That's only sense. It may *look* like paint and *smell* like paint in the can. But on the brush and on your house—the poor quality shrieks.

Compare the "cheap" formula with SWP!

If you are tempted to use a "low price" house paint—one that is claimed, even guaranteed and warranted, to be "just as good as SWP,"—*GO SLOW!* Remember that *low price* and *low quality* go hand in hand. You can't make a silk purse from a sow's ear.

Make the formula test! Insist upon seeing the formula of the "cheap" paint, either on the label or in the literature of the company.

Compare the materials used in making the "*cheap*" paint with the ingredients of fine old SWP House Paint—as shown in the formula which is plainly printed on every SWP can. Take Outside Gloss White for example:

Note the big percentage of *White Lead Carbonate* and *White Lead Sulphate* used in fine old SWP Outside Gloss White. White lead should be the *basic* ingredient of all white paint and light tints. It is to these paints exactly what flour is to bread.

See how much less of this basic ingredient is used in the average "cheap" white paint.

Zinc oxide, another costly pigment, is the next essential ingredient. A liberal percentage of zinc oxide combined with a large amount of white lead makes for a *balanced formula*—such as the formula of SWP Outside Gloss White House Paint. It assures a finish of superior wearing quality.

THE ACCEPTED STANDARD THE WORLD OVER . . .

0007-SWP-038964

0007-SWP-000122342
