Buenos Aires, October 24th, 1941

Dr. Robert A. Kehoe
Kettering Laboratory of Applied Physiology
University of Cincinnati
Cincinnati, Ohio, U.S.A.

Dear Dr. Kehoe,

I am sending you under separate cover a magazine called "Revista del Trabajo" which has been published in Chile. On pages 16-24 you will find an article by Dr. Osvaldo Esquivel entitled "Saturnismo Profesional". I had thought of translating the article for you, but there are so many medical terms that I felt I could not give you a satisfactory translation. No doubt, with the help of Les Roberts you will be able to understand the article.

I would draw your attention to the last paragraph of the Section headed "Bencina", on page 19. I am surprised to hear that the operators do not always use their protective equipment and am writing to Chile to find out on what the author of the article bases his remarks.

Sincerely yours,

C. L. RISSO-GILL
