

Now...

trade-marked lead pipe!

Stamped every few
inches with name that
means high quality

When you buy Dutch Boy Solder, you can be sure of getting the same composition each time. Every bar, every ingot, is numbered to denote its grade. And there's a grade for every soldering purpose, including wiping.

WITH the new marking on National Lead pipe, it's an easy matter to identify this pipe of uniform quality.

Every few inches, the National Lead name and the Dutch Boy trade-mark are stamped into the metal of National Lead pipe. This marking gives unmistakable assurance of proper wall thickness—correct weight per foot. It enables you to be doubly certain that the jobs you do with lead pipe will be trouble-free.

Lead pipe has been known for years

as the longest-lasting plumbing. It never rusts, never clogs with rust-scale. You can use smaller pipe and still insure a permanent, adequate water supply. It is flexible. In installing, you can string it like wire, and make bends without the use of elbows.

Lead pipe comes in any length you need—requires few joints to complete an installation.

When you want to do a job that won't develop leaks or trouble—urge your customers to install lead pipe!
