Re: OD 22379-22
Maxwell Van Cleve
Owens Illinois Company
Columbus, Ohio

Attention: Judy Spencer

Dear Ms. Spencer:

Industrial hygiene and occupational disease investigations have been conducted by the writer and other Division of Safety and Hygiene Industrial Hygienists at the Owens Illinois facility. Asbestos usage was verified at the plant: Asbestos was used in gloves, transfer contact points, and the Lehrs. It is not certain that full-asbestos suits were utilized during furnace repair jobs. Mr. Van Cleve's job is listed as a maintenance person for most of his 37 years as an employee of Owens Illinois Company (facsimile file). Therefore, he would be expected to have some exposures to asbestos fibers. The exact airborne concentrations of fibers and the frequency of exposure can only be speculated at this post-exposure time.

Respectfully submitted,

Neil E. Marquard
Industrial Hygienist
