Re: Texture Finish

We understand from one of the Cleveland drywall contractors, Mr. John Deacon, that he plans on going to Milwaukee next week to view a spray application of texture finish on ceilings with a piece of equipment manufactured by the subject company. This is a new item to the writer and we are not previously familiar with their type of spray machine. We understand, however, that both USG and National Gypsum Co. have a product for this purpose that can be sprayed.

Are you familiar with this type of application and do we have a competitive material to offer? Please advise.

Best or Acoustical Plaster
