Operations

The remaining drum stock of blends containing tin-tetraphenyl was discarded this month. A total of 9,765 pounds of Pyranol 1467 and 1,035 pounds of Pyranol 1470 were written off.

We now have in department stock 40,800 pounds of an Aroclor capacitor fluid, Pyranol 1481. This stock is about four years old and of questionable quality. This blend is a mixture of 75% 1254 and 25% tri-chlorobenzene. The Pyranol 1481 stock will be used to make 1254 PPO and future production of Pyranol 1481 will be made on receipt of order.
