NAPA FILTERS INTRODUCES NEW FUEL DISPENSING PUMP FILTERS

NAPA Filters has introduced two new fuel dispensing pump filters — the NAPA 4009 Water Alert Gasoline Pump Filter and the NAPA 4011 Water Alert Diesel Fuel Pump Filter. Both pump filters are designed to overcome dirt and water contamination in car fuel tanks. Contaminants are filtered out as the fuel is drawn out of underground storage tanks into the dispensing pump.

Both pump filters provide an effective filtration of solid contaminants, drastically reducing the fuel flow from the dispensing pump when a harmful amount of water reaches the filters. Both filters include all the features of the standard NAPA dispensing pump filter, and the NAPA 4009 filter has the added benefit of water detection and automatic flow shut-off.

The NAPA 4009 and 4011 water alert dispensing filters were both designed to be used with the NAPA 4001 or 4034 spin-on mounting bases. For additional information consult pages 484-487 of the 1985 NAPA Filters Catalog or contact your NAPA Filters representatives.

NAPA MUFFLER AND SHOCKS INTRODUCES THE GAS CHARGED "GRANDE 60"

With its introduction of the new Gas Charged "Grande 60" shock absorber and the Gas Charged Load Stabilizer unit, NAPA Muffler and Shocks is now offering a fuller line of gas charged ride control products.

The NAPA Gas Charged "Grande 60" employs the most advanced technology available in the ride control industry. The combination of gas charging and full displacement valving provides a new level of performance for pickups, vans and 4-wheel drive vehicles (4 x 4's). The nitrogen gas charging results in improved shock performance, with better control and a smoother ride.

"Grande 60" shocks feature a 1-3/8 inch bore for more consistent control and a 5/8 inch rod for maximum strength. The ten-stage full displaced valving automatically adjusts to road extremes for better handling and control, regardless of the terrain.

Its durability, extreme handling characteristics and ride control enable the NAPA Gas Charged "Grande 60" to provide the ultimate in ride control for the light truck market.

For the smoothest load assist ride available, NAPA Muffler and Shocks has introduced the NAPA Gas Charged Load Stabilizer. Designed for improving riding comfort, control and handling, the unit is ideal for sagging suspensions caused by heavy loads or weakened springs.

NEW PRODUCTS AVAILABLE FROM NAPA LIGHTING

A number of new products are now available from NAPA Lighting and Safety Products. Included are Quartz Halogen Fog and Driving Lights, Snow Plow Light, Bar Marker Light and the West Coast Mirror.

The new, clear Fog and Driving Lights beam light forward in a pattern far beyond the range of regular high beams. The new yellow Fog Auxiliary Lights cut through fog, rain, and snow with ease and provide a wider headlight pattern for greater side-of-road visibility.

Providing 50% more seeing distance than standard incandescent bulbs, the Snow Plow Light, with its plastic halogen sealed beam, is the new lamp everyone is talking about. It weighs 70% less than similar bulbs, helping to absorb road shock in all kinds of rough terrain, even on the coldest of days.

The new Cushionlite Bar Marker Light is the latest addition to NAPA Lighting's already popular Cushionlite family. Because of its one-piece unibody construction that saves installation time and protects against gradual moisture, the Bar Marker Light is growing in popularity.

NAPA Light's new 6" x 16" West Coast Mirror is perfect for the medium size truck, class 3 on up to the heavy trucks, class 7 and 8. The West Coast mirror combines the strength and durability of aluminum and steel with outstanding value.

Contact your D.C. or NAPA Lighting and Safety Products representative for further information on this array of new products.

NAPA NEW CARBURETORS/HOLLEY CONTINUES TECHNICAL SERVICE CLINICS

More technical service and advice clinics from NAPA New Carburetors/Holley Replacement Parts will be offered during the 1985 racing season.

By season's end NAPA New Carburetors/Holley Replacement technicians will have serviced almost 6,000 carburetors and answered even more technical questions. Technicians will disassemble, clean, adjust and reassemble carburetors and provide free small repair parts. The remaining events on this year's schedule are as follows:

ASSOC.	MEET	DATES	LOCATION
NHRA	U.S. Nationals	Aug. 28- Sept. 2	Indianapolis, IN
NSRA	Nats North	Sept. 13-15	Detroit, MI
Peterson	4-Wheel Off Road Nats	Sept. 27-29	Indianapolis, IN
NHRA	World Final Nats	Oct. 18-20	Pomona, CA
Clinic	Halloween Classic	Oct. 25-27	Norwalk, OH

In addition to providing support at racing and street rod events, NAPA New Carburetors/Holley Replacement Parts also offers 50-75 technical clinics for jobbers each year. Each clinic is two to four hours long.

For more information regarding any type of clinic offered by NAPA New Carburetors/Holley Replacement Parts contact your D.C. or NAPA New Carburetors/Holley Replacement representative.

NAPA/MAC'S NEW LIQUID CAR WASH

Taking advantage of consumer demand for improved car appearance products, NAPA/Mac's is introducing its fourth new product in only six months — Blue Max Liquid Car Wash.

The Blue Max Liquid Car Wash is available in 16-ounce containers from all NAPA Distribution Centers.

Each bottle provides 32 washes and is uniquely formulated to powerfully clean even the dirtiest of vehicles, without harming today's modern automotive finishes. To find out more about this product and others offered by NAPA/Mac's, contact your D.C. or NAPA/Mac's representative.
