Mr. Paul D. Halley
Acting Director, Industrial Hygienist
State of West Virginia
Department of Health
Charleston 5, West Virginia

Dear Mr. Halley:

Thank you very much for your letter of October 14. It certainly goes to show how mixed up people can get when they are a thousand miles apart.

I certainly think we ought to go ahead with Dr. Smyth's work, and I am sure Monsanto will defray the expense. I appreciate your point of view and believe that Dr. Smyth is better qualified to handle such work than Kettering Institute.

I am sorry I didn't realize exactly what your plans were, as it would have obviated this correspondence. I will write to Dr. Smyth and ask him if they can do the work.

Will you be able to obtain the samples to send him, or should that be done by members of our organization? I am sure both Dr. Durland and Dr. Nelson would appreciate your technical assistance and advice as to exactly what kind of samples to get and from where they should be obtained.

Very truly yours

R. Emmet Kelly

R. Emmet Kelly, M.D.
Medical Director
