DOCUMENT DESCRIPTION: Letter to Dr. Rennnie RE Asbestos Concerns

161

JMcN/IL.

Dr. H.N. Rennie,
Macquarie Chambers,
183 Macquarie Street,
SYDNEY.

8th March, 1963.

Dear Dr. Rennie,

Thank you again.

The enclosed copy of a letter from Dr. Wagner may interest you. He is in error in assuming that there have been three other cases of mesothelioma associated with asbestos exposure.

The reference to the possible slightness of exposure especially in childhood is one that has always worried me and why I have always decried the practice of using mill tailings for laying paths etc., in the township.

For the rest of the letter, naturally any help or assistance would be very welcome and the Company has certainly been quite co-operative in so far as investigation, at least, is concerned. I doubt that there would be any need for an approach to the federal authorities and the co-operation of the State can be taken for granted.

Don Lathan is in Sydney now staying at St. Paul's College and he would, I know, be very pleased to have the opportunity of discussing the problem with you.

Kind regards,

Yours sincerely,
