Subject: DuPont Washington Works Model Input Files

Chris and Karl,

I guarantee a check by Hanshaw against permit applications re: stack flows and velocities. I need to understand anything we might be submitting for the modeling that might not be consistent with our representation in permit applications.

Also, be aware that as soon as he sees this, due to the focus of the DEP right now, this will be Hanshaw's number one priority vs. processing other applications.

Deb,

Thanks for getting this out today, even if there is more data to follow. Hanshaw asked again today if I knew if this was going to be out today. We need to maintain credibility with him.

Subject: DuPont Washington Works Model Input Files

Chris,

Here are the model input files for the source parameters and the site boundary. I am still working on gathering building information, and should be able to get it to you by Monday or Tuesday next week. Also, I am sending you a copy of the met data file that I have, to make sure that we are using the same file.

If you have any questions, please give me a call.

Debbie
