Good morning, Steven and Andy

Attached please find EEI's paper on CCRMU GW deadlines. If you have any immediate questions, please feel free to reach out to me otherwise we can briefly touch base on this document at the end of our meeting on the 14th.

Talk soon,
Richard

Subject: EEI CCR Updates

Good Morning Steven and Andy,

I wanted to provide some updates on the work EEI and its members have been doing.

First, I hope to send you a CCRMU GW Deadline paper this Friday or next Monday. The paper will discuss the issue members are facing and the time needed to meet the initial GW monitoring requirements.

Second- you may recall engagement with DTE on the free liquids memo, the difficulty in meeting the standards and EEI's request to rescind the free liquids memo. DTE and EEI would like to meet in person on April 14th (DTE senior leadership is in town that day) to discuss issues with the memorandum and site-specific issues DTE is facing. I am happy to work with schedulers to find the time that works best.

Third- we continue to work as quickly as possible on regulatory changes to the closure performance standard. In the coming weeks we should have information to share on issues facing different units and possible regulatory changes.

Finally- we continue to work to gather information on on-site beneficial use with members. If there is anything we can provide in the near term to help with issuing a memo that allows on-site use- please let us know.

Looking forward to the on-going conversations and we are happy to have any conversations with you whenever you would like as EEI and its member develop papers on the above topics.

-Richard
